Interests

Distributed web services, cloud computing, smart hardwares, data mining, SNS, mobile applications, open source.

Work Experience

Web Architect / Core Full-Stack Developer, EXFE Holdings, Sep 2011 - current
EXFE(<https://shuady.cn> / <http://itunes.apple.com/app/exfe/id514026604>) is a start-up that builds a group utility for gathering and hangout. I was responsible for leading a small team working on the web framework, server-side API (for both website and iOS / Android client) and web front-end. I designed the entire back-end framework and finished all the server-side codes as the first employee of this start-up. In this job, I started to build my own leadership to manage a development team, not just code alone. And I learned lots of things about how to build a start-up project, run a small company.

PHP Engineer, Safirst Technology Co., Ltd, March 2010 - Sep 2011

Our team developed an enterprise management application. This system is designed as a SaaS project. I was responsible for development of a distributed PHP MVC framework which my workmates built apps on top of it.

In additional I implemented some more features, for example:

- Enterprise workflow engine with online workflow editor based on SVG and JavaScript.
- Enterprise datacenter with version control.
- Distributed file management system with version control.

Web Engineer, WebOrigin Ltd New Zealand, Oct 2008 - March 2010

WebOrigin is a website building company. My major contributions included two projects. One is WebOrigin CMS another is WebOrigin Store:

- WebOrigin CMS is a simple CMS suitable for small and medium businesses.
- WebOrigin Store is an online selling system where transactions are conducted through PayPal.

Other Experiences

- Graphic & Web Design, LiDan Advertising And Media Co., Ltd
July 2008 - October 2008
- Graphic & Web Design, Qingyuan Cable TV Co., Ltd
July 2007 - August 2007, Internship
- Founder of H3O Networks(a graphic & web design studio)
June 2004 - September 2005

Education

- Bachelor of E-Commerce, South China Normal University, Guangzhou China
September 2005 - June 2008
Graduation Project: Built a city public transport query system with GIS information.
- International Accounting, South China Normal University, Guangzhou China
September 2003 - June 2004

Honors / Achievements

- Outstanding Young Volunteers of South China Normal University, 2005
- Guangdong Provincial Award of Programming, 2001

Foreign Language Skills

English: Have good communication ability of English speaking and coordination. Can read and write technical documents in English. Proficient in IT-related English vocabulary.

Computer Skills

- **Main Languages:** C, Python, Node, JavaScript, PHP, Pascal, ASP, ASP.Net, VB
- **Limited Languages:** Objective-C, Ruby, Lua, Common Lisp, C++, MS .Net
- **Platforms:** BSD, Linux, Mac OS, Windows
- **Database:** Redis, MongoDB, Memcache, MySQL, SQLite, MS SQLServer
- **Graphic / Design / Multimedia NLE:** Adobe Create Suite, Apple Final Cut Studio

Comprehensive and deep understanding of IT industry, specially modern web applications and mobile computing field. Have some ideas about creating mobile apps and SNS apps. Can independently design and implement an idea. Can integrate various technology and knowledge to solve practical problems.

Personality

As a potential employee, you will find me a hardworking, responsible, and honest person.

I am also an optimistic and active person who understands how to maintain work-life balance and still work efficiently under stress.

I am always keen on exploring new things and view this process as an effective way of learning. I am a big fan of technology because technology is about innovation.

Further, I am a good communicator and know how to establish and maintain good interpersonal relationships. These skills were developed during my life time in university where I was a co-founder of my university's Music Association.

Last but not least, I always set myself a high moral standard and behave ethically.
